Test Case / Original Request

Run test case PTC-003 using k6, monitor it, analyze the results, and generate the final PDF report with links to the native JMeter report and raw results.

REAL Execution Outcome

Execution status: COMPLETED
Runner status: completed
Outcome details: REAL k6 execution completed. Threshold breaches, if any, are retained as performance findings.
Thresholds passed: False

Executive Summary

Application: Unknown
Scenario: Content Feedback API — Load Check
Job ID: JOB-eeb314a0147243fbaaa275ff545d0101
Overall Result: FAIL

Performance assessment for the Content Feedback API showed threshold breaches in error rate (1.01%) and significant response time spikes, indicating intermittent failures and outlier latency that require further investigation. However, host infrastructure metrics (CPU, memory) remained within expected parameters, showing no signs of resource-related bottlenecks. No security analysis was available for this run. Time-series trends confirm rising error rates and increasing latency during the test window.

Execution Profile and Artifacts

Execution mode: REAL
Workload profile:
- tool: k6
- target_url: https://jsonplaceholder.typicode.com
- endpoint: /posts/1/comments
- method: GET
- users: 15
- max_rps: 10
- duration_seconds: 60
- ramp_up_seconds: 5
- expected_status_code: 200
- p95_threshold_ms: 5000
Artifact directory: src/generated_scripts/k6 native reports/JOB-eeb314a0147243fbaaa275ff545d0101

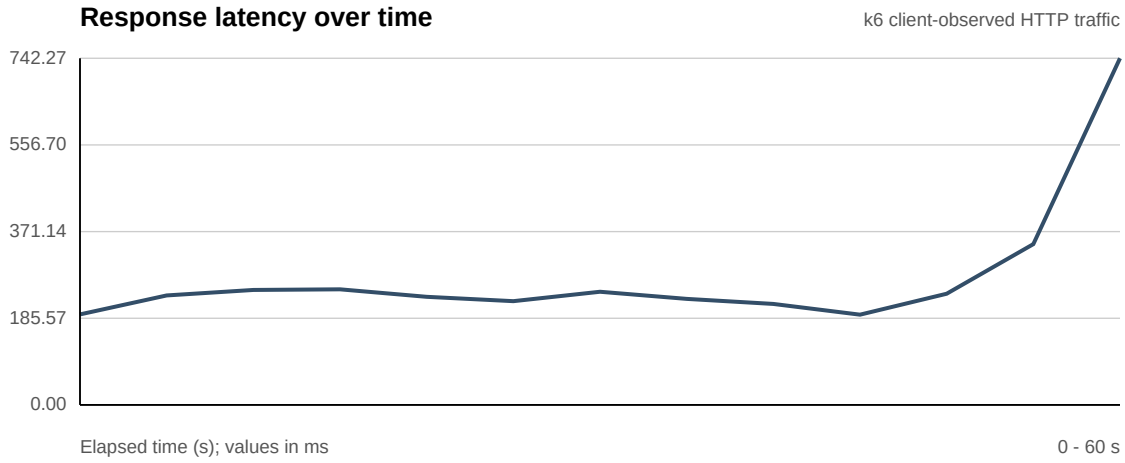
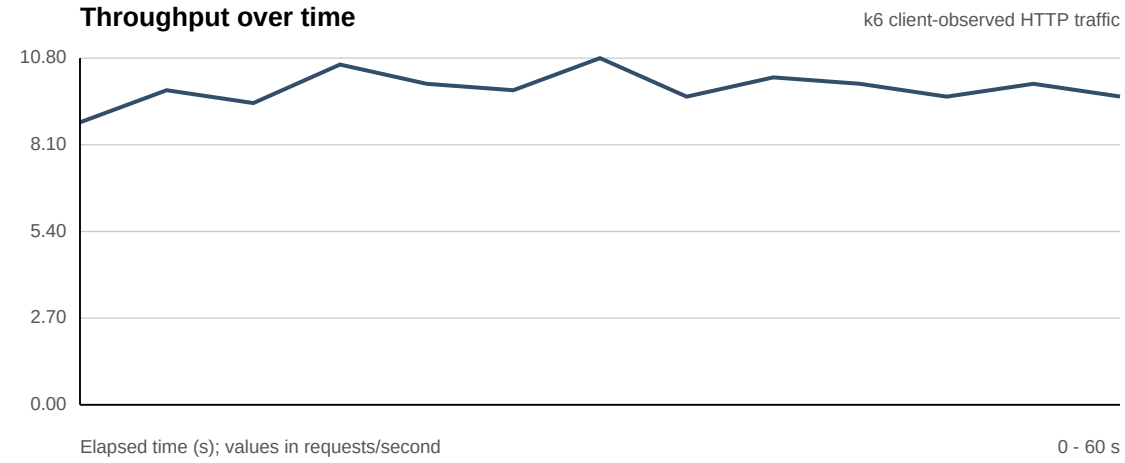
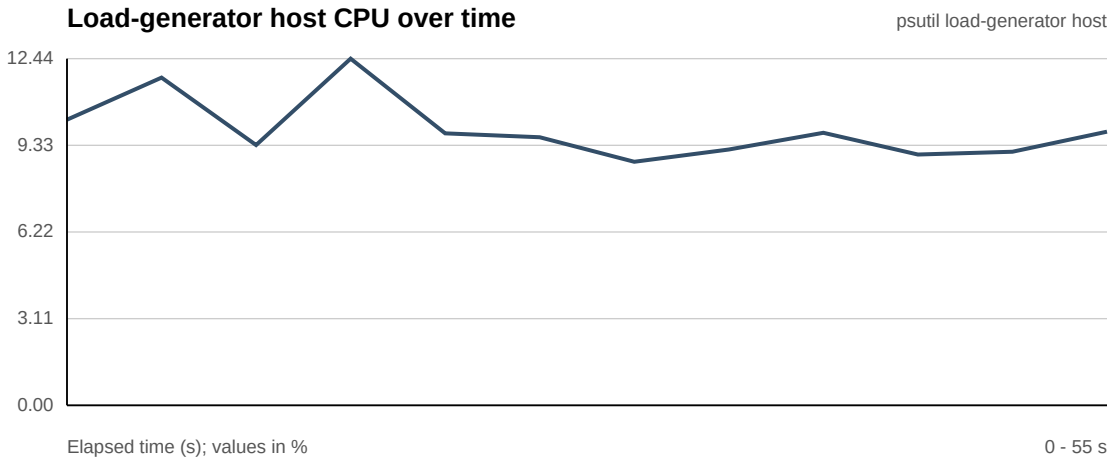
The interactive native HTML dashboard is linked as a separate artifact and is not embedded in this PDF.

Time-Series Charts (REAL Measurements)

Charts show measured values in five-second aligned buckets. Host CPU is from the load-generator machine, not the target.







Agent Activity Summary

Agent	*Summary*
Test Execution	Load test executed on /posts/1/comments (Unknown - Content Feedback API — Load Check). Results: 595 total requests, 589 successful, 6 failed. Avg response time: 238.60602184873946 ms; 95th percentile: 447.79459999999966 ms; Max: 2570.921 ms. Throughput: 9.890529130176501 TPS; Error rate: 1.01%.
Monitoring	CPU usage: 9.89% average, 20.6% peak; memory: 77.75% average, 79.4% peak; DB connections: not collected, TPS: 9.890529130176501, Response time: 238.60602184873946 ms. Data source and scope: REAL: psutil load-generator host samples and k6 client-observed metrics. Measurement provenance: cpu_usage=psutil (load_generator_host); cpu_peak_usage=psutil (load_generator_host); memory_usage=psutil (load_generator_host); memory_peak_usage=psutil (load_generator_host); response_time=k6 (load_generator_observed_http_traffic); tps=k6 (load_generator_observed_http_traffic); db_connections=not_collected (No target-specific database telemetry provider is configured.). No alerts triggered.
Security Validation	Security validation was not run for this job.
Analysis	Performance assessment for the Content Feedback API showed threshold breaches in error rate (1.01%) and significant response time spikes, indicating intermittent failures and outlier latency that require further investigation. However, host infrastructure metrics (CPU, memory) remained within expected parameters, showing no signs of resource-related bottlenecks. No security analysis was available for this run. Time-series trends confirm rising error rates and increasing latency during the test window.
Reporting	A PDF report was generated, including all findings, recommendations, and an executive summary.

Per-API Findings (Test Execution)

- /posts/1/comments [FAIL / high]
avg=238.60602184873946ms p95=447.79459999999966ms max=2570.921ms
throughput=9.890529130176501 req/s error_rate=1.01% http_status=200
* Error rate 1.01% exceeds 1.0% threshold.
* Max response time (2570.921ms) is 5.7x p95 (447.79459999999966ms) -- outlier spikes present.
history: No historical context available to compare this run; assessment is based solely on current threshold breaches.
recommendation: The error rate and response time spikes breach static thresholds. Review possible causes for intermittent errors and consider investigating outlier latency causes. If these are newly occurring, escalate per runbook.

Infrastructure Health (Monitoring)

Status: PASS (monitoring_agent reported: OK)
CPU usage: 9.89% Memory usage: 77.75% DB connections: None TPS: 9.890529130176501
Response time (monitoring): 238.60602184873946ms

Recommended Next Steps

- /posts/1/comments: The error rate and response time spikes breach static thresholds. Review possible causes for intermittent errors and consider investigating outlier latency causes. If these are newly occurring, escalate per runbook.
