Executive Summary

Application: Internet Banking
Scenario: Net Banking
Job ID: JOB-d9acfc65
Overall Result: FAIL

Performance tests detected a failure in the Net Banking Service due to an error rate of 1.69%, which exceeds the acceptable threshold of 1.0%. No monitoring or security results were provided for this job, so analysis is limited to test execution data. There is no available historical context to further qualify this anomaly. The high error rate should be promptly investigated.

Per-API Findings (Test Execution)

- Net Banking Service [FAIL / high]
avg=222.79ms p95=297.42ms max=424.27ms throughput=152.38 req/s error_rate=1.69% http_status=200
* Error rate 1.69% exceeds 1.0% threshold.
history: No historical context or previous runs are available for this anomaly; analysis is based solely on current threshold breach.
recommendation: Investigate and resolve the underlying causes of elevated error rate (1.69%). No documented incident or runbook matches this scenario. Review logs and error traces for root causes. Relying on threshold analysis only due to lack of historical context.

Recommended Next Steps

- Net Banking Service: Investigate and resolve the underlying causes of elevated error rate (1.69%). No documented incident or runbook matches this scenario. Review logs and error traces for root causes. Relying on threshold analysis only due to lack of historical context.
