Test Case / Original Request

Run PTC-002 using JMeter. Execute the real performance test, monitor it, assess the security surface for the same job and configured target, analyze the results, and create the final PDF with links to the native report and raw results.

REAL Execution Outcome

Execution status: FAILED
Runner status: failed
Outcome details: JMeter exceeded its bounded timeout of 180 seconds; the JMeter process group was terminated.
Performance measurements were unavailable or failed quality validation; reason: No test_execution records were provided for this job.

Agent Activity Summary

Agent	*Summary*
Test Execution	No test execution data was available for this job.
Monitoring	Monitoring was not run for this job.
Security Validation	Status: WARNING. Security score: 0%. Live security check: completed. Issue: Strict-Transport-Security was not present in the observed response; this single response does not establish the full origin policy. Issue: Scope limitation: configuration validator outcomes describe profile declarations; any live result is a separate single-request observation and does not prove control effectiveness. Issue: Live HEAD observation completed with HTTP status 200; response headers are observations only, not proof of control effectiveness. Control coverage: {'requested_count': 1, 'assessed_count': 1, 'not_assessed_count': 0} Control assessment evidence: - external_surface: assessed; basis=live_observation; evidence=['live-observation:JOB-4c375a6760bc4594b3069133156c432f'] Evidence references: live-observation:JOB-4c375a6760bc4594b3069133156c432f Recommendation: Review whether an HSTS policy is appropriate for this HTTPS API origin.
Analysis	REAL jmeter execution status: failed. JMeter exceeded its bounded timeout of 180 seconds; the JMeter process group was terminated. No performance conclusion is drawn from metrics that were unavailable.
Reporting	A PDF report was generated, including all findings, recommendations, and an executive summary.
