Test Case / Original Request

Run test case PTC-001 using k6. Execute the real test, collect monitoring and security results, analyze the combined results, and generate the final PDF report using the Report Agent.

REAL Execution Outcome

Execution status: COMPLETED
Runner status: completed
Outcome details: REAL k6 execution completed. Threshold breaches, if any, are retained as performance findings.
Thresholds passed: True

Executive Summary

Application: Unknown
Scenario: Content Record Retrieval API — Load Check
Job ID: JOB-fcb38778b03846e3852d4a9c8e2d78fb
Overall Result: WARNING

Test execution completed successfully with all performance thresholds met for the Content Record Retrieval API. No errors or unexpected latency were observed, and throughput remained stable throughout the test duration. Infrastructure monitoring flagged high memory usage on the load-generator host, resulting in a warning, but this did not impact test-level client response or throughput. Security findings were not provided for this run. Overall, the API performed as expected with one infra warning to note.
