## Test Case / Original Request

Run PTC-005 using Jmeter. Execute the real performance test and collect monitoring results. Assess the security surface for the same job and exact configured target.Analyze the current job’s results and generate the final PDF with security coverage and evidence, plus links to the native JMeter report, raw results, and final PDF.

## REAL Execution Outcome

Execution status: FAILED
Runner status: failed
Outcome details: JMeter failed with exit code 1; see the runner and JMeter logs.
Process exit code: 1
Performance measurements were unavailable or failed quality validation; reason: No test_execution records were provided for this job.

## Executive Summary

Application: jsonplaceholder.typicode.com
Scenario: Task Status API — Load Check
Job ID: JOB-fa24270156244c8591ab9f9ac92b36bd
Overall Result: FAIL

REAL jmeter execution status: failed. JMeter failed with exit code 1; see the runner and JMeter logs. No performance conclusion is drawn from metrics that were unavailable.

## Execution Profile and Artifacts

Execution mode: REAL
Workload profile:
- tool: jmeter
- target_url: https://jsonplaceholder.typicode.com
- endpoint: /todos/1
- method: GET
- users: 25
- max_rps: 15
- duration_seconds: 60
- ramp_up_seconds: 5
- expected_status_code: 200
- p95_threshold_ms: 5000
Artifact directory: src/generated_scripts/Jmeter native reports/JOB-fa24270156244c8591ab9f9ac92b36bd
Artifact references:
- generated_script: src/generated_scripts/Jmeter native reports/JOB-fa24270156244c8591ab9f9ac92b36bd/jmeter_PTC_005_plan.jmx
- monitoring_samples: src/generated_scripts/Jmeter native reports/JOB-fa24270156244c8591ab9f9ac92b36bd/jmeter_PTC_005_plan_runtime_samples.csv
- runner_log: src/generated_scripts/Jmeter native reports/JOB-fa24270156244c8591ab9f9ac92b36bd/jmeter_PTC_005_plan_runner.log
Native report package unavailable: the execution manifest does not contain both the native report and raw results.

## Agent Activity Summary

| *Agent* | *Summary* |
|---|---|
| Test Execution | No test execution data was available for this job. |
| Monitoring | Monitoring was not run for this job. |
| Security Validation | Status: WARNING.<br>Security score: N/A.<br>Live security check: not assessed.<br>Issue: The external API surface observation did not complete, so no response-security findings are claimed.<br>Issue: external_surface was not assessed; missing evidence: Live security checks are disabled by trusted deployment configuration..<br>Issue: Scope limitation: configuration validator outcomes describe profile declarations; any live result is a separate single-request observation and does not prove control effectiveness.<br>Issue: Requested live security check was blocked: Live security checks are disabled by trusted deployment configuration.<br>Control coverage: {'requested_count': 1, 'assessed_count': 0, 'not_assessed_count': 1}<br>Control assessment evidence:<br>- external_surface: not_assessed; basis=live_observation; evidence=[]<br>Assessment limitations:<br>- Live security checks are disabled by trusted deployment configuration.<br>- No runtime security checks were performed; results describe configuration declarations only.<br>- The requested live security observation did not complete. |
| Analysis | REAL jmeter execution status: failed. JMeter failed with exit code 1; see the runner and JMeter logs. No performance conclusion is drawn from metrics that were unavailable. |
| Reporting | A PDF report was generated, including all findings, recommendations, and an executive summary. |

## Per-API Findings (Test Execution)

No per-API findings were produced.

## Security Findings (Security Agent)

Status: WARNING Security score: N/A
Security result job ID: JOB-fa24270156244c8591ab9f9ac92b36bd.
Live security check: not assessed.
Issues:
- The external API surface observation did not complete, so no response-security findings are claimed.
- external_surface was not assessed; missing evidence: Live security checks are disabled by trusted deployment configuration..
- Scope limitation: configuration validator outcomes describe profile declarations; any live result is a separate single-request observation and does not prove control effectiveness.
- Requested live security check was blocked: Live security checks are disabled by trusted deployment configuration.

Control coverage: {'requested_count': 1, 'assessed_count': 0, 'not_assessed_count': 1}
Requested controls: external_surface
Not assessed controls: external_surface
Control evidence and provenance:
- external_surface: not_assessed; basis=live_observation; evidence fields=[]; references=[]
Live observation: unknown unknown endpoint; HTTP unavailable; elapsed unavailable ms; requests sent 0.
Assessment limitations:
- Live security checks are disabled by trusted deployment configuration.
- No runtime security checks were performed; results describe configuration declarations only.
- The requested live security observation did not complete.

## Recommended Next Steps

- Security: address the issues/recommendations listed above before next deployment.
